PROFESSIONAL SUMMARY

Experienced web developer with 2+ years of hands-on expertise in HTML, CSS, JavaScript, Node.js, MongoDB, React.js. Proficient in building responsive, user-friendly web applications. Strong problem-solving skills with a collaborative approach. Dedicated to delivering high-quality code and continuously expanding technical capabilities.

TECHNICAL SKILLS

Frontend: ReactJS, JavaScript, HTML, CSS, jQuery

Backend: Node.js, ExpressJS, RESTful APIs

Version Control: Git, Bitbucket

Database: MongoDB, SQL (Basic Knowledge)

Others: Jira, Data Modeling, Agile (Scrum), Design Patterns, Debugging, Root Cause Analysis

EXPERIENCE

Associate Software Developer || Optimiser India Pvt Ltd || Noida, India

October 2022 - Present

- I had the opportunity to work as an Associate Software Developer at Optimiser India Pvt Ltd. During my time there, I was able to develop and deliver variety of software solutions.
- Experience with server-side development using Node.js
- Familiarity with React.js for building interactive user interfaces.
- Skilled in database management with MongoDB
- Debugging and resolving existing system issues.
- Developing unit tests to ensure functionality.
- Maintaining high-quality coding standards.
- Designing and *developing new features* for existing systems.

Application Developer/Intern || Decimal technologies || Gurugram, India

January 2022 - May 2022

- At Decimal technologies, India, I served as a Application Developer Intern for 4 months. During this period, I was responsible for:
 - Designing Application Interface using their own Low code no code platform.
 - Developing API and testing it on Postman.
 - Testing applications for accuracy and functionality.
 - Working collaboratively with other developers to optimize the codebase

EDUCATION

Institute of Management Studies, Ghaziabad || **MCA (Master of Computer Application)** || CGPA: 8.8 || August 2020 - July 2022

Bhagwati Institute of technology & Science || **BCA (Bachelor of Computer Application)** || CGPA: 6.4 || August 2017 - July 2020

PROJECTS

Superhero Hunter || JavaScript, HTML, CSS

- This is a web application built using JavaScript, HTML, and CSS that allows users to search for their favorite Marvel superheroes and view their detailed information. The app also allows users to add characters to their favorites list for easy access.
- Integrated Marvel API(<https://developer.marvel.com/>) in Admin Panel and optimized codebase to ensure seamless performance and scalability, resulting in improved efficiency and user experience.

Weather Forecast Application || JavaScript, React Js, Node Js, HTML, CSS3

- Developed a weather forecast application that displays current weather conditions and forecasts for different locations.
- Integrated with a weather API (OpenWeatherMap) to fetch weather data.
- Allow users to search for specific locations and view detailed weather information.
- Use React.js for the frontend and Node.js for the backend.

Fitness Tracker || React Js, Node Js, Express Js, Chart Js, MongoDB

- Fitness Tracker: Created a fitness tracking app where users can log their workouts, set fitness goals, and track their progress over time. Include features like exercise database, workout planner, and progress charts.

Expense Tracker Application || React Js, Node Js, Express Js, Chart Js, MongoDB

- The Expense Tracker application is designed to help users manage their finances by tracking their expenses, categorizing transactions, setting budgets, and generating reports.
- It provides users with a user-friendly platform to monitor their spending habits, identify areas for saving, and achieve financial goals.
